

Vosges 2019 - Faune et flore

Pensées des Vosges et anémones Pulsatilles

A photograph of a forest of beech trees. The trees have thick, gnarled, and moss-covered trunks. The ground is covered in a thick layer of brown, fallen leaves. The canopy is dense with bright green leaves. The text "Hêtres « Bonsaï »" is overlaid in the lower right quadrant of the image.

Hêtres « Bonsaï »

Myrtilles en fleurs

Dent de lion

A photograph showing a chamois and its young in a lush green meadow. The chamois is in the foreground, and its young is slightly behind it. The background is filled with dense green trees.

Chamois et son petit

A circular inset photograph showing two chamois on a snowfield. The snow is white and appears to be melting, with some dark patches visible. The chamois are small and dark against the white snow.
